

Tableau comparatif des araignées sauteuses les plus communes : grosses à moyennes

Les espèces sont rangées par tailles (à l'âge adulte) et par proximité des habitats.

<i>Philaeus chrysops</i>	★	7 à 10 mm		
				
<i>Menemerus taeniatus</i>	★	7 à 12 mm		
				
<i>Menemerus semilimbatus</i>	★	8 à 9 mm		
				
<i>Marpissa muscosa</i>	★	8 à 12 mm		
				
<i>Marpissa radiata</i>	★	(esp proche : <i>Marpissa pomatia</i>)	6 à 9 mm	
				
<i>Carrhotus xanthogramma</i>	★	6 à 8 mm		
				
<i>Macaroeris nidicolens</i>	★	4 à 8 mm		
				
<i>Aelurillus v-insignitus</i>	★	(esp proche : <i>Asianellus festivus</i>)	6 à 8 mm	
				
<i>Salticus scenicus</i>	★	5 à 7 mm		
				
<i>Salticus propinquus</i>	★	5 à 7 mm		
				
<i>Salticus cingulatus</i>	★	4 à 6 mm		
				
<i>Salticus zebraneus</i>	★	3 à 4 mm		
				
<i>Evarcha arcuata</i>	★	(esp proches : <i>E. michaelovi</i> , <i>E. laetabunda</i>)	6 à 7 mm	
				
<i>Evarcha jucunda</i>	★	5 à 7 mm		
				
<i>Evarcha falcata</i>	★	5 à 7 mm		
				
<i>Icius subinermis</i>	★	(esp proches : <i>I. hamatus</i> , <i>I. congener</i>)	4 à 7 mm	
				
<i>Pseudicius encarpatus</i>	★	5 à 7 mm		
				
<i>Dendryphantes rudis</i>	★	5 à 6 mm		
				
<i>Pellenes tripunctatus</i>	★	5 à 8 mm		
				
<i>Pellenes geniculatus</i>	★	(esp proches : <i>P. arciger</i> , <i>P. brevis</i> ...)	3 à 5 mm	
				
<i>Phlegra fasciata</i>	★	5 à 7 mm		
				
<i>Phlegra bresnieri</i>	★	(esp proche : <i>P. cinereofasciata</i>)	5 à 6 mm
